

Model

**GP - 700 Series**

**GARUDAN<sup>®</sup>**

Single and two needle high speed  
post bed machines with upper driven  
roller, needle and lower circular feed

**Convincing price  
/ performance ratio**

## Technical features

The new series can be used for practically all single and two-needle stitching work in the shoe industry. Fancy and assembly seams on shoes can be stitched easily and in top seam quality, covering the entire range of light to medium-heavy materials.

New series has integrated mini servo drive with power 750 W. Twin-needle machines are equipped with standard needle gauge 2.4 mm. Following needle gauges are optionally available: 1.6 mm, 1.8 mm, 2.0 mm, 2.2 mm.

### Product advantages:

- max. sewing speed 3.000 rpm
- easily adjustable thread trimmer with short thread ends, for thread sizes up to 20/3 synthetic
- integrated mini servo drive
- safety clutch for the hook system
- low noise level
- built-in bobbin winder
- low prices for all consumable parts and conversion kits
- exceptional price

**Integrated mini servo drive.**  
All machines come with integrated mini servo drive with power 750 W.

**Built-in bobbin winder.**  
Machines are equipped with built-in bobbin winder.
